## BRIEF BUSINESS ITEMS OF INTEREST TO ALL TULSANS WHO BELIEVE IN GIVING THEIR PATRONAGE TO THE HOME INDUSTRY

Tulsa Motor & Cycle Co.  
"The motorcycle business looks  
most encouraging for 1916," say  
Ely Brothers of the Tulsa Motor  
& Cycle Co., agents for the Ex-  
celsior. "Since January 1 we  
have sold 21 machines, which is  
a record-breaker during that  
short time. The Excelsior fac-  
tory for the past five years has  
been continuously making mod-  
ern and up-to-date improvements,  
until now it is at the highest  
standard quality, being the latest,  
most reliable and conveniently  
operated motorcycle of the pres-  
ent day."

The Tulsa Motor & Cycle Co.  
has been a Tulsa firm for the past  
three years, their business increas-  
ing about 300 per cent during that  
time. They are now permanently  
located at 224 East Second street.

H. R. Ketchum.  
H. R. Ketchum says:  
"Never busier in my life than  
at the present time. I have the  
largest outfit of its kind in the  
state, and could easily find em-  
ployment for double the equip-  
ment if I had it. Prospects were  
never better for a banner year.  
There is no need of any idle men  
in Tulsa."

Tulsa Home Decorating Co.  
This concern has been in busi-  
ness in Tulsa two years and has  
had a steady increase in business.  
Last year being their best year.  
There is being a better class of  
work done now than before, as  
people want better material and  
workmanship.

Formerly the decorator or  
painter merely had to deal with  
colors and paints, and use them to  
the best advantage. Nowadays a  
decorator is compelled to have  
knowledge of the several branches  
in rugs, furnishings and draper-  
ies, their adaptation, selection and  
utility, and even the plastering  
branch of building construction,  
advising for rough or smooth plas-  
ter, relief or stucco work, carpen-  
ter or cabinet work. He must  
make himself familiar with all  
these things in order to carry out  
his scheme and produce the ef-  
fects which he may desire to pro-  
duce in the respective rooms of  
the modern house.

The decorating, and, to some ex-

tent, the furnishing, has become  
almost as much a part of his cal-  
culation and work as the mere  
painting. He must make his in-  
teriors handsome and inviting.  
The tenant when negotiating for  
a first-class house is no longer  
content with bare, white walls and  
plain floors. The demand in such  
cases is for a house that is fin-  
ished according to the modern  
idea. Like everything else in  
building construction, these per-  
plexities are turned over to the  
architect to solve, but the modern  
metropolitan owner or manager  
must take them into his business  
along with brick, cement and  
steel.

Mack Neer Plumbing & Heating  
Co.

The Mack Neer Plumbing com-  
pany is owned and controlled by  
Mack Neer, a practical plumber  
and heating engineer.

They also keep a force of work-  
men on repair work who are ready  
to give quick service day or night.  
Their aim is to please the pub-  
lic as well as serve them.

In planning your bathroom or  
heating plant they will give you  
expert advice and estimations ab-  
solutely free. Their prices are  
reasonable as their expenses are  
small. They handle a full line of  
first-class plumbing supplies and  
ready to serve you at all times.

Mid-West Supply Co.

The Mid-West Supply company,  
organized under the laws of Okla-  
homa some four or five months  
ago, since which time it has  
built a brick building of its own  
on North Boulder, reports that  
it is doing very good business.  
The members have had a practical  
experience for the last 15 years.  
They are amply able to handle all  
kinds of material and, in turn, are  
putting out first-class material  
and are men of good word and  
good reputation. They at all times  
carry a full line of stock and in-  
vites all producers and con-  
tractors to inspect their material  
before buying elsewhere, assuring  
them that they will receive the  
most courteous treatment and  
prompt attention.

Sunnyside Sanitarium.

The construction of the new  
hospital, to be owned and con-  
ducted by the Rouleau sisters,  
(nurses) now running Sunnyside  
sanitarium, is to begin this week.  
It will be a 25-bed hospital,  
modern in every respect. It will  
be the aim of the faculty, as has

been in the past, to make the place  
homelike, deviating exceedingly  
from the ironclad rules of larger  
hospitals. The diets will be su-  
pervised by one who has made a  
thorough study of the cooking for  
invalids and sick.

The Rouleau sisters are known  
as good, competent nurses, having  
completed a thorough course in  
good training schools with special  
training in obstetrics and surgery.

Western Rope & Cordage Co.

Speaking of the use of wire  
rope in the oil regions for drilling,  
cleaning out, pumping and num-  
erous other purposes, Amos Mit-  
chell, of the Western Rope &  
Cordage Co. of this city, jobber in  
wire and manila ropes, states that  
the increase in the use of wire  
rope during the past two years is  
something remarkable. It is esti-  
mated that the amount which will  
be used in the Mid-Continent  
fields alone during the present  
year will be approximately 20-  
000,000 feet. The Western Rope &  
Cordage Co. has the exclusive  
agency in the Mid-Continent  
fields for the well-known Macom-  
ber & Whyte lines. The Western  
has taken single orders for over  
sixty miles of wire rope. The  
principal trouble at the present  
time is in securing adequate sup-  
plies from the manufacturers.

The time was, and not so many  
years ago, when drilling was all  
done with manila cables, but after  
years of experimenting it was  
found that in drilling wells two  
thousand feet or deeper and es-  
pecially where the drilling had to  
be done through a hole full of  
fluid, wire drilling lines could be  
used to great advantage and con-  
siderable economy, and the oil  
country contractors and operators  
were quick to avail themselves of  
the improvement, once it had been  
demonstrated.

The Macomber & Whyte Rope  
Co. has specialized in the manu-  
facture of lines for oil well uses,  
and, through its representative,  
the Western Rope & Cordage Co.,  
markets a considerable tonnage in  
the central and southern fields.

Brown's Business College.

Tulsa leads all other cities in  
salaries paid bookkeepers and  
stenographers. The demand ex-  
ceeds the supply. This fact is  
proven by business men employ-  
ing undergraduates. Brown's  
Business college has enjoyed a  
phenomenal growth, but has never  
been in a position to meet the de-  
mand.
